

Your Journey Begins

Preparing for a new baby is great fun, but it's important to know exactly what you'll need, to avoid expensive mistakes. This step-by-step buying guide will help make the path to parenthood a little bit easier!

Closer to Nature Bottle Feeding

Stock up on newborn essentials in the last few weeks of your pregnancy (it's recommended before 36 weeks so you or your partner won't be panic buying once the baby's born).

On-the-Go Weaning Moms

Soon you'll be wanting to go out more, here are some tommee tippee essentials you may wish to stock up on:

- Explora Easi-Roll Bibs
- Explora Truly Spill Proof Straw Cup
- Explora Weaning Bowl with Lid & Spoon
- Explora Heat Sensing Spoons

Tomme Tippee Top Tips:

1. You will need about 8–12 bottles if you are planning to bottle feed exclusively.
2. A sterilizer is a must for all your breastfeeding equipment.
3. Replace your pacifier after one month for safety and hygiene reasons.
4. Have a few cups to hand, one in the car, one in your bag as they always seem to go missing.
5. You can never have enough spoons, as they tend to get lost easily and turn up in the most unusual places.
6. Bibs are essential in the weaning process, as most food tends to go on baby rather than in baby.
7. The in-bottle formula dispensers are great for making up a fresh feed every time.
