TOON GOOGLES

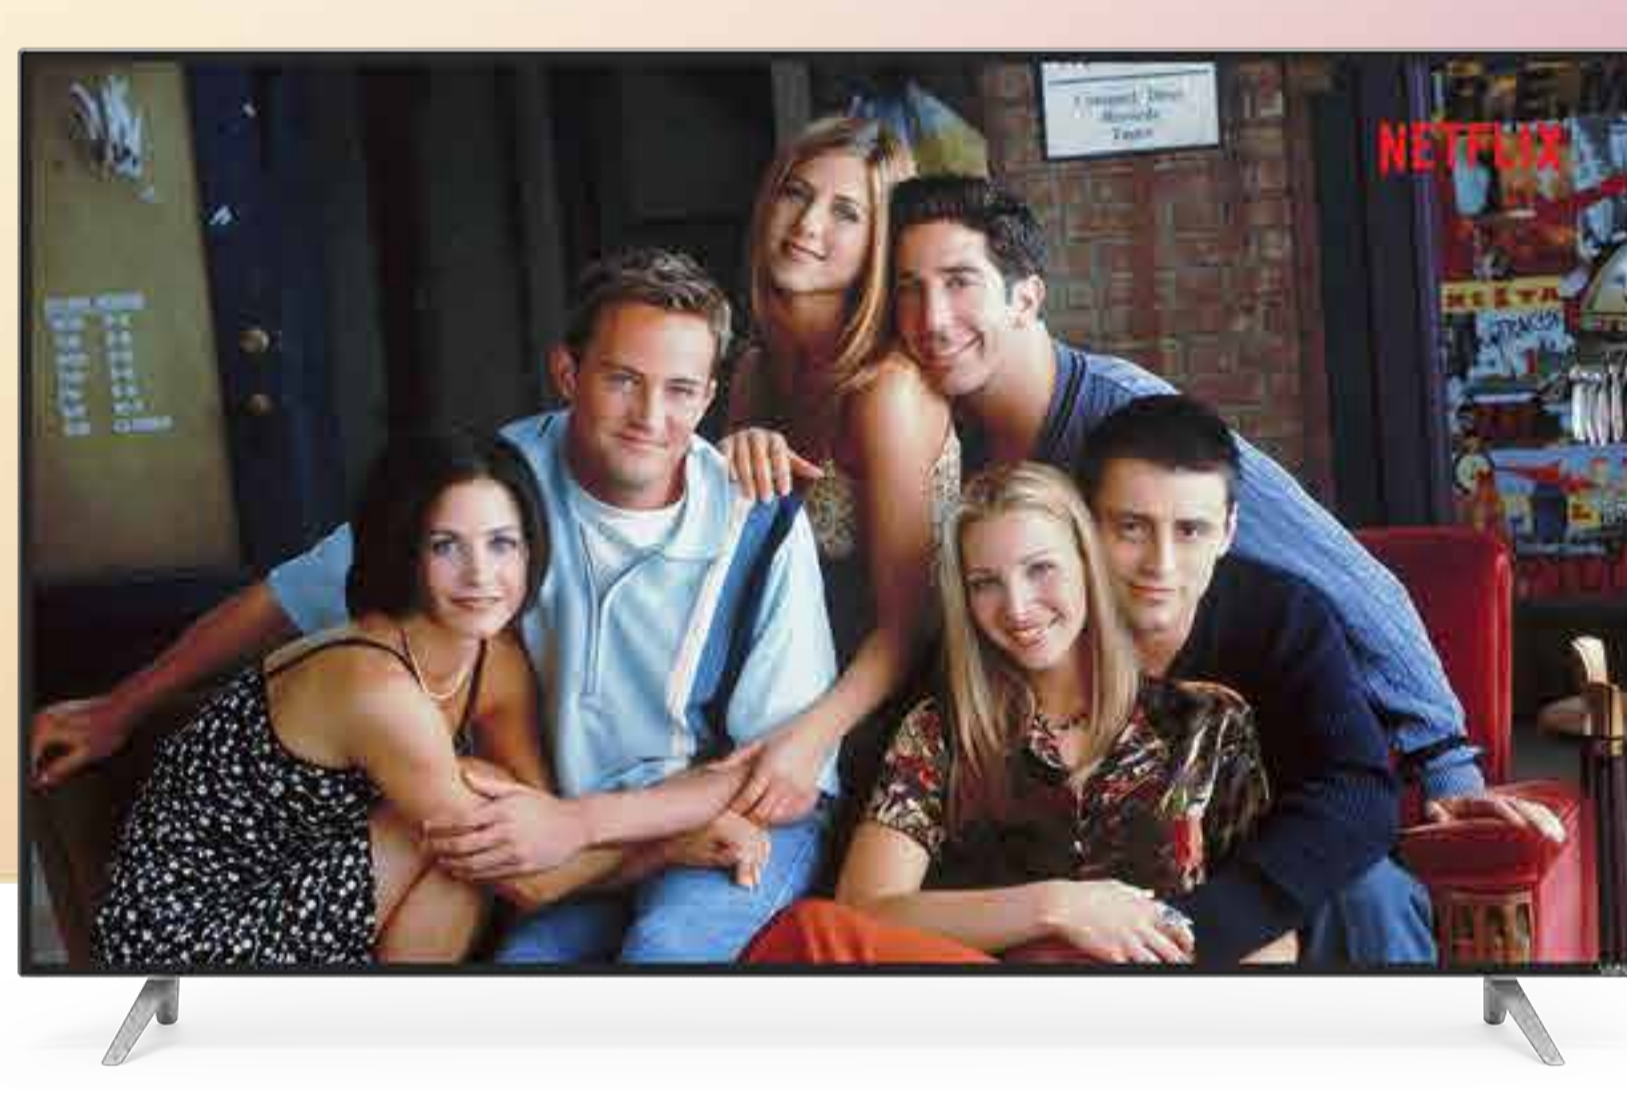

### The Titles You Want, Now Playing in 4K.

ULTRA HD QUALITY

## Everything You Watch, Beautifully Upscaled.

When VIZIO 4K TVs upscale, the result is indistinguishable from true UHD. Every show, movie, video game and live event automatically scales up from ordinary HD and Full HD to 4K quality for an experience that's sharper, clearer and undeniably more beautiful.

"To upscale HD content to 4K, a TV must double the pixels, replicating the data to form a seamless image... Vizio's Spatial Scaling Engine is one of the best 4K upscaling engines I've seen so far."

THE VERGE

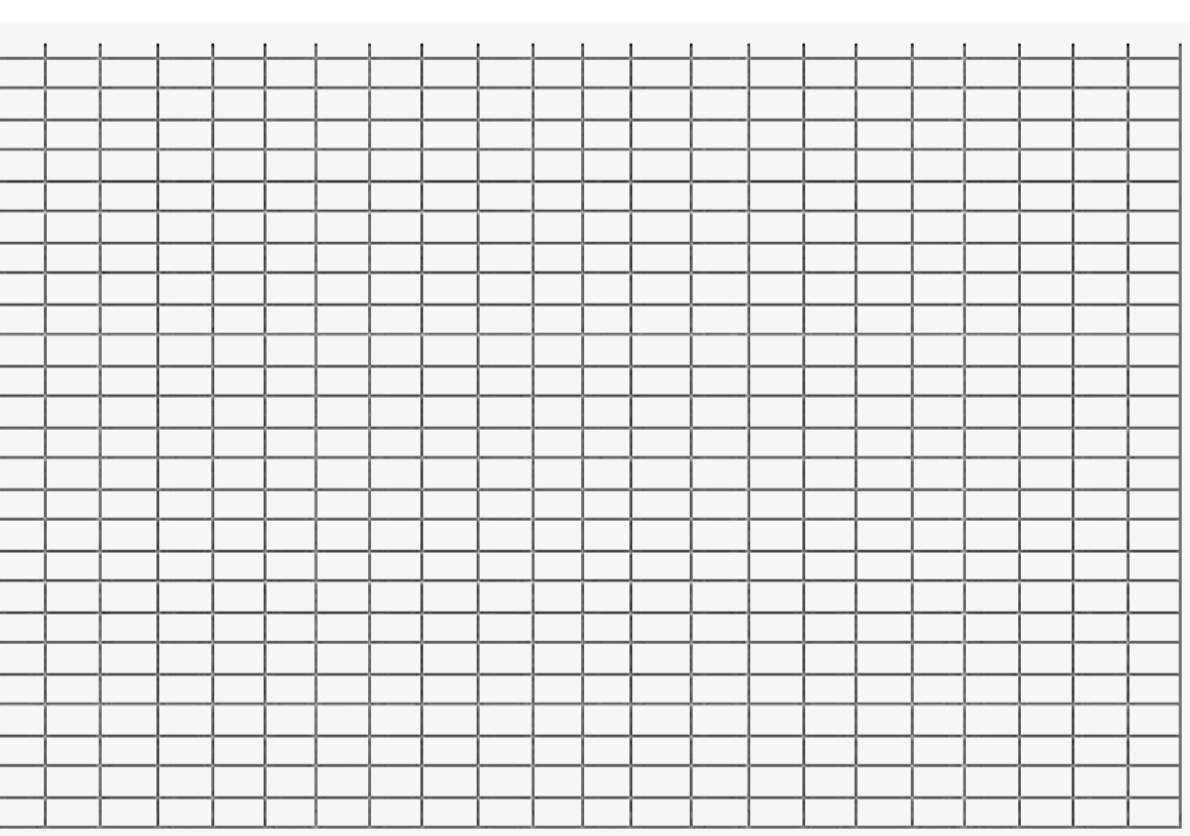

### UHD Spatial Scaling Engine.

The UHD Spatial Scaling Engine produces UHD picture quality with sharper images with higher definition by multiplying, enhancing and fine-tuning each individual pixel.

### V6 Six-Core Processor.

VIZIO achieves this high-performance upscaling through an integrated V6 Six-Core Processor - a two-chip solution comprised of a quad-core GPU and a dual-core CPU.

HOW IT WORKS  
**VIZIO intelligently upscales to 4K by multiplying pixels.**
