Paint and Wallpaper

It's easy to Devine it yourself with
12 perfect, ready-mixed Devine Colors
and 12 coordinated Devine prints
and patterns.

Try these projects or create your own one-of-a-kind design:

A-door-able: Pop a fresh coat of paint on a panel door, then place wallpaper inside the panel. Great idea for cabinets and vanities, too.

File under pretty: Transform a dull file cabinet with wallpaper pattern applied to drawer fronts. Speaking of drawers, go ahead and dress them up too, with wallpaper pattern inside.

Show off: Bring a bookcase to life with color and pattern combined. Place wallpaper behind shelves and admire your new look.

Picture this: Frame selected parts of wallpaper for instant art. P.S. They look even more lovely hung on a freshly painted wall.

Step up your style: Simply apply Devine Wallpaper to stair risers. And why not freshen up your trim with Devine Color while you're at it.

Sweet dreams: Create a faux headboard above your bed with Devine Wallpaper. Match paint and wallpaper colors for a subtle look or contrast them to make a stronger statement.

Go glam: Make your own stripes with strips of metallic Devine Wallpaper set against a bold color. Go vertical or horizontal, it's eye-catching and easy either way.

Wow your wall: Roll on a radiant Devine Color on half the wall, and peel and stick Devine Wallpaper on the other half. No rules: try paint on the bottom, wallpaper on top. Chair rail trim is optional, but adds a finished look.

Tray chic: Jazz up a tray with a fresh coat of Devine Color, then put wallpaper in the center of the tray. Stack them up for instant style.
