

## **Dyson Tools**

*A small, sleek gray vacuum head passes over a fabric surface.*

ON SCREEN TEXT: This is the Dyson Tangle-free Turbine tool.

*The 6-inch-wide head passes over furniture, picking up hair.*

ON SCREEN TEXT: It's the only turbine tool that removes hair without tangling.

*A view of the underside of the head shows two twirling heads with bristles. Strands of hair glide between the heads as they spin opposite each other.*

ON SCREEN TEXT: Counter-rotating heads with brushes remove hair and dirt from carpets and upholstery.

*A woman uses the turbine tool, attached to a flexible nozzle, to vacuum a pet bed.*

ON SCREEN TEXT: With no brush bar for hair to wrap around

ON SCREEN TEXT: more hair and dirt is released straight into the bin than with any other turbine tool.

*A woman vacuums a car with the turbine tool. It picks up dirt from the floor mat, leaving a clean streak behind it. She vacuums dust from the seat.*

ON SCREEN TEXT: The articulating base plate ensures constant contact with uneven surfaces.

*A woman runs the head along a curved surface. The base plate flexes around the contours.*

ON SCREEN TEXT: And the heads reach to the front and sides of the tool drawing in hair and dirt from all angles.

*The vacuum cleans carpeted stairs. In slow motion, its bristle-covered heads rotate along the surface.*

*An image of the tool appears on a white background.*
